Missouri DEPARTMENT OF ELEMENTARY & SECONDARY

Missouri Education Dashboards Show-Me Data

The Problem

All education data reported by the Department of Elementary and Secondary Education (DESE) are displayed in formats that are difficult to navigate and interpret. The department needed to report data in a more meaningful and user-friendly manner.

aggregate data and drill downs that

- increase the visibility and availability of education data. •
- provide **context** and **meaning** to the data identified by parents as most important.
- present an **intuitive**, parent-friendly user experience. •

The Goal

Visualizations are a natural means of comprehending data. Missouri Education Dashboard (MOEDD) aims to give Missouri citizens, educators, administrators, and legislators the tools to make the best decisions for Missouri's students, families, and local education agencies (LEAs).

The Team

Jeff Falter, Chief Data Officer, DESE

Seunghee Han, Planner, DESE Lakshman Kodali, Software Engineer, E-Solutions Kimberly Luebbering, Coordinator of Special Projects, DESE Jane Maddox, Assistant Director of Data Governance, DESE Madalynn Moeller, Program Specialist, DESE Micah Porter, Data Administrator, DESE Amanda Ressel, Research Analyst, DESE Maria Sommerer, Technical Writer, DESE Stacey Smith, Software Engineer, Envision, LLC Helen Stewart, Research Analyst, DESE Michelle Wagner, Data Administrator, DESE

MOEDD tells the story of Missouri students' education through dynamic, visual stories using the educational data collected from LEAs.

Example 1: MOEDD Building Expenditures Per Pupil

The Plan

The project team developed an interactive dashboard, which provides a snapshot of high-level,

The Results

Example 2: MOEDD Kindergarten through 12th Grade Enrollment
