

Early Connections: Shared Early Childhood Website

The Problem

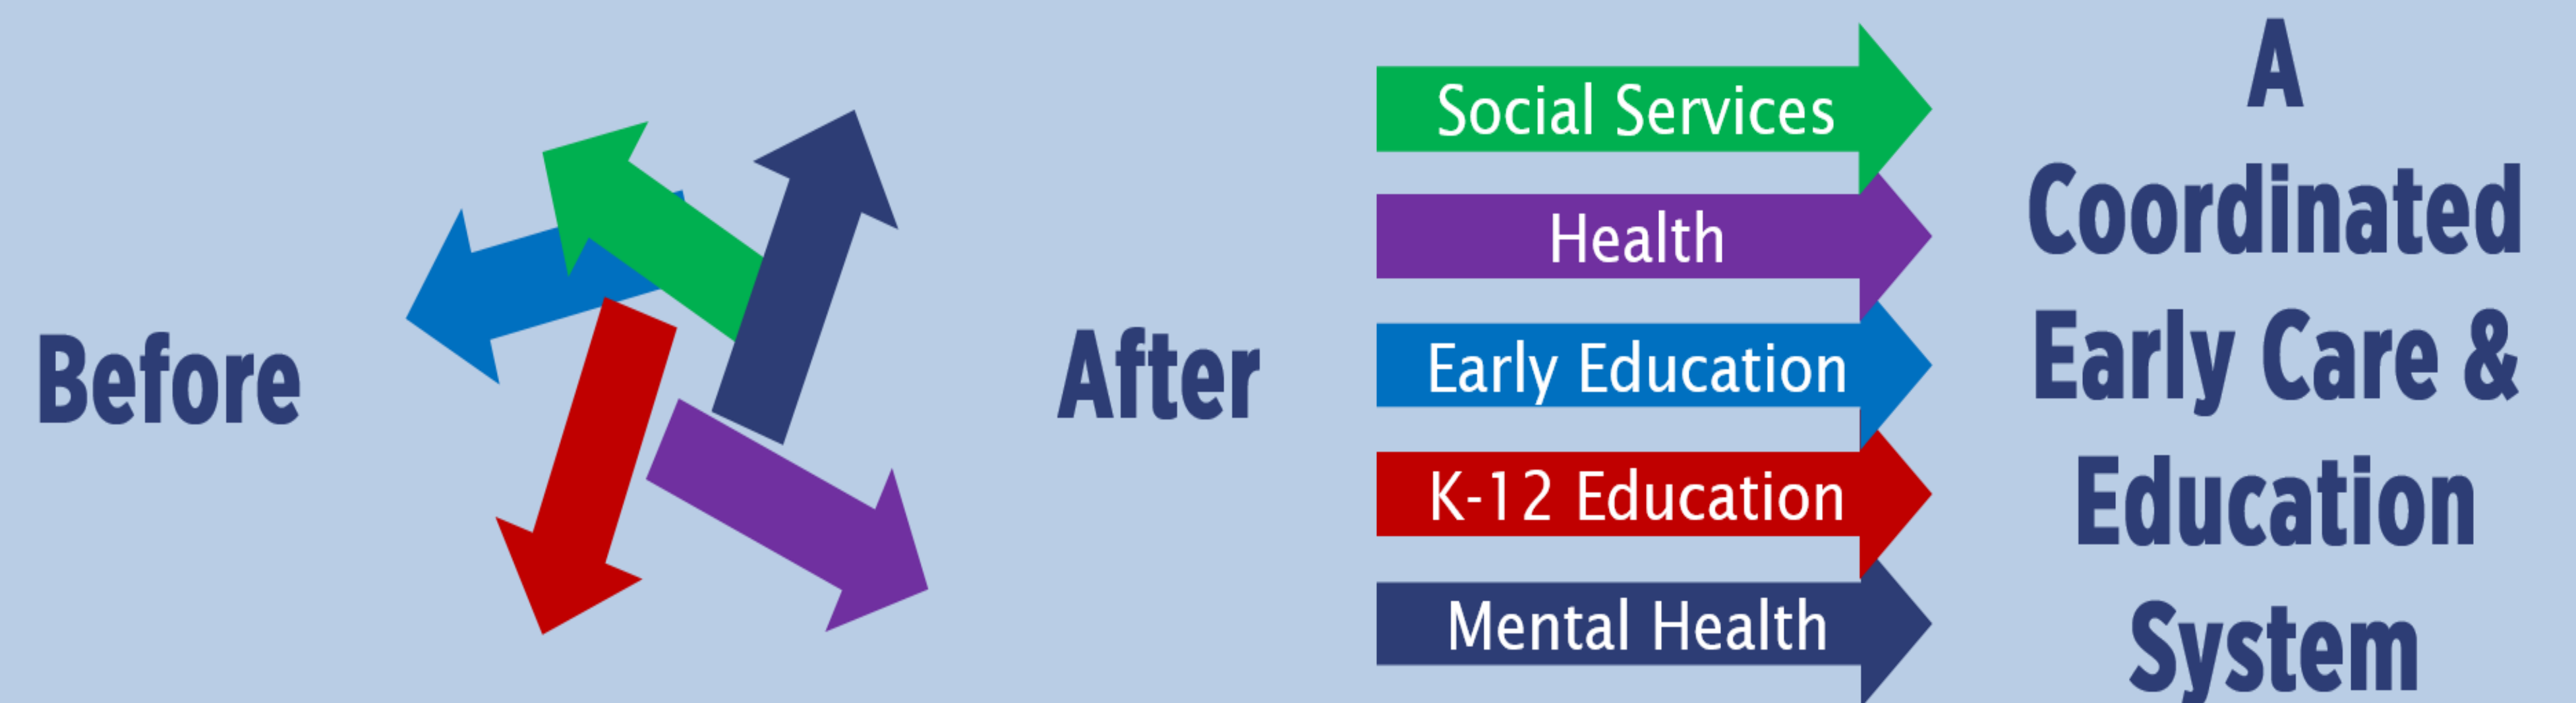

Multiple state agencies have websites with early childhood information, making it difficult for families and professionals to find important resources in a timely manner.

The Plan for Improvement

- Partner with the Missouri Department of Mental Health (DMH) to repurpose content on their Healthy Kids website.
- Partner with the Office of Administration (OA) to launch a more modern, functional website that is user-friendly and easy to navigate.

The Goal

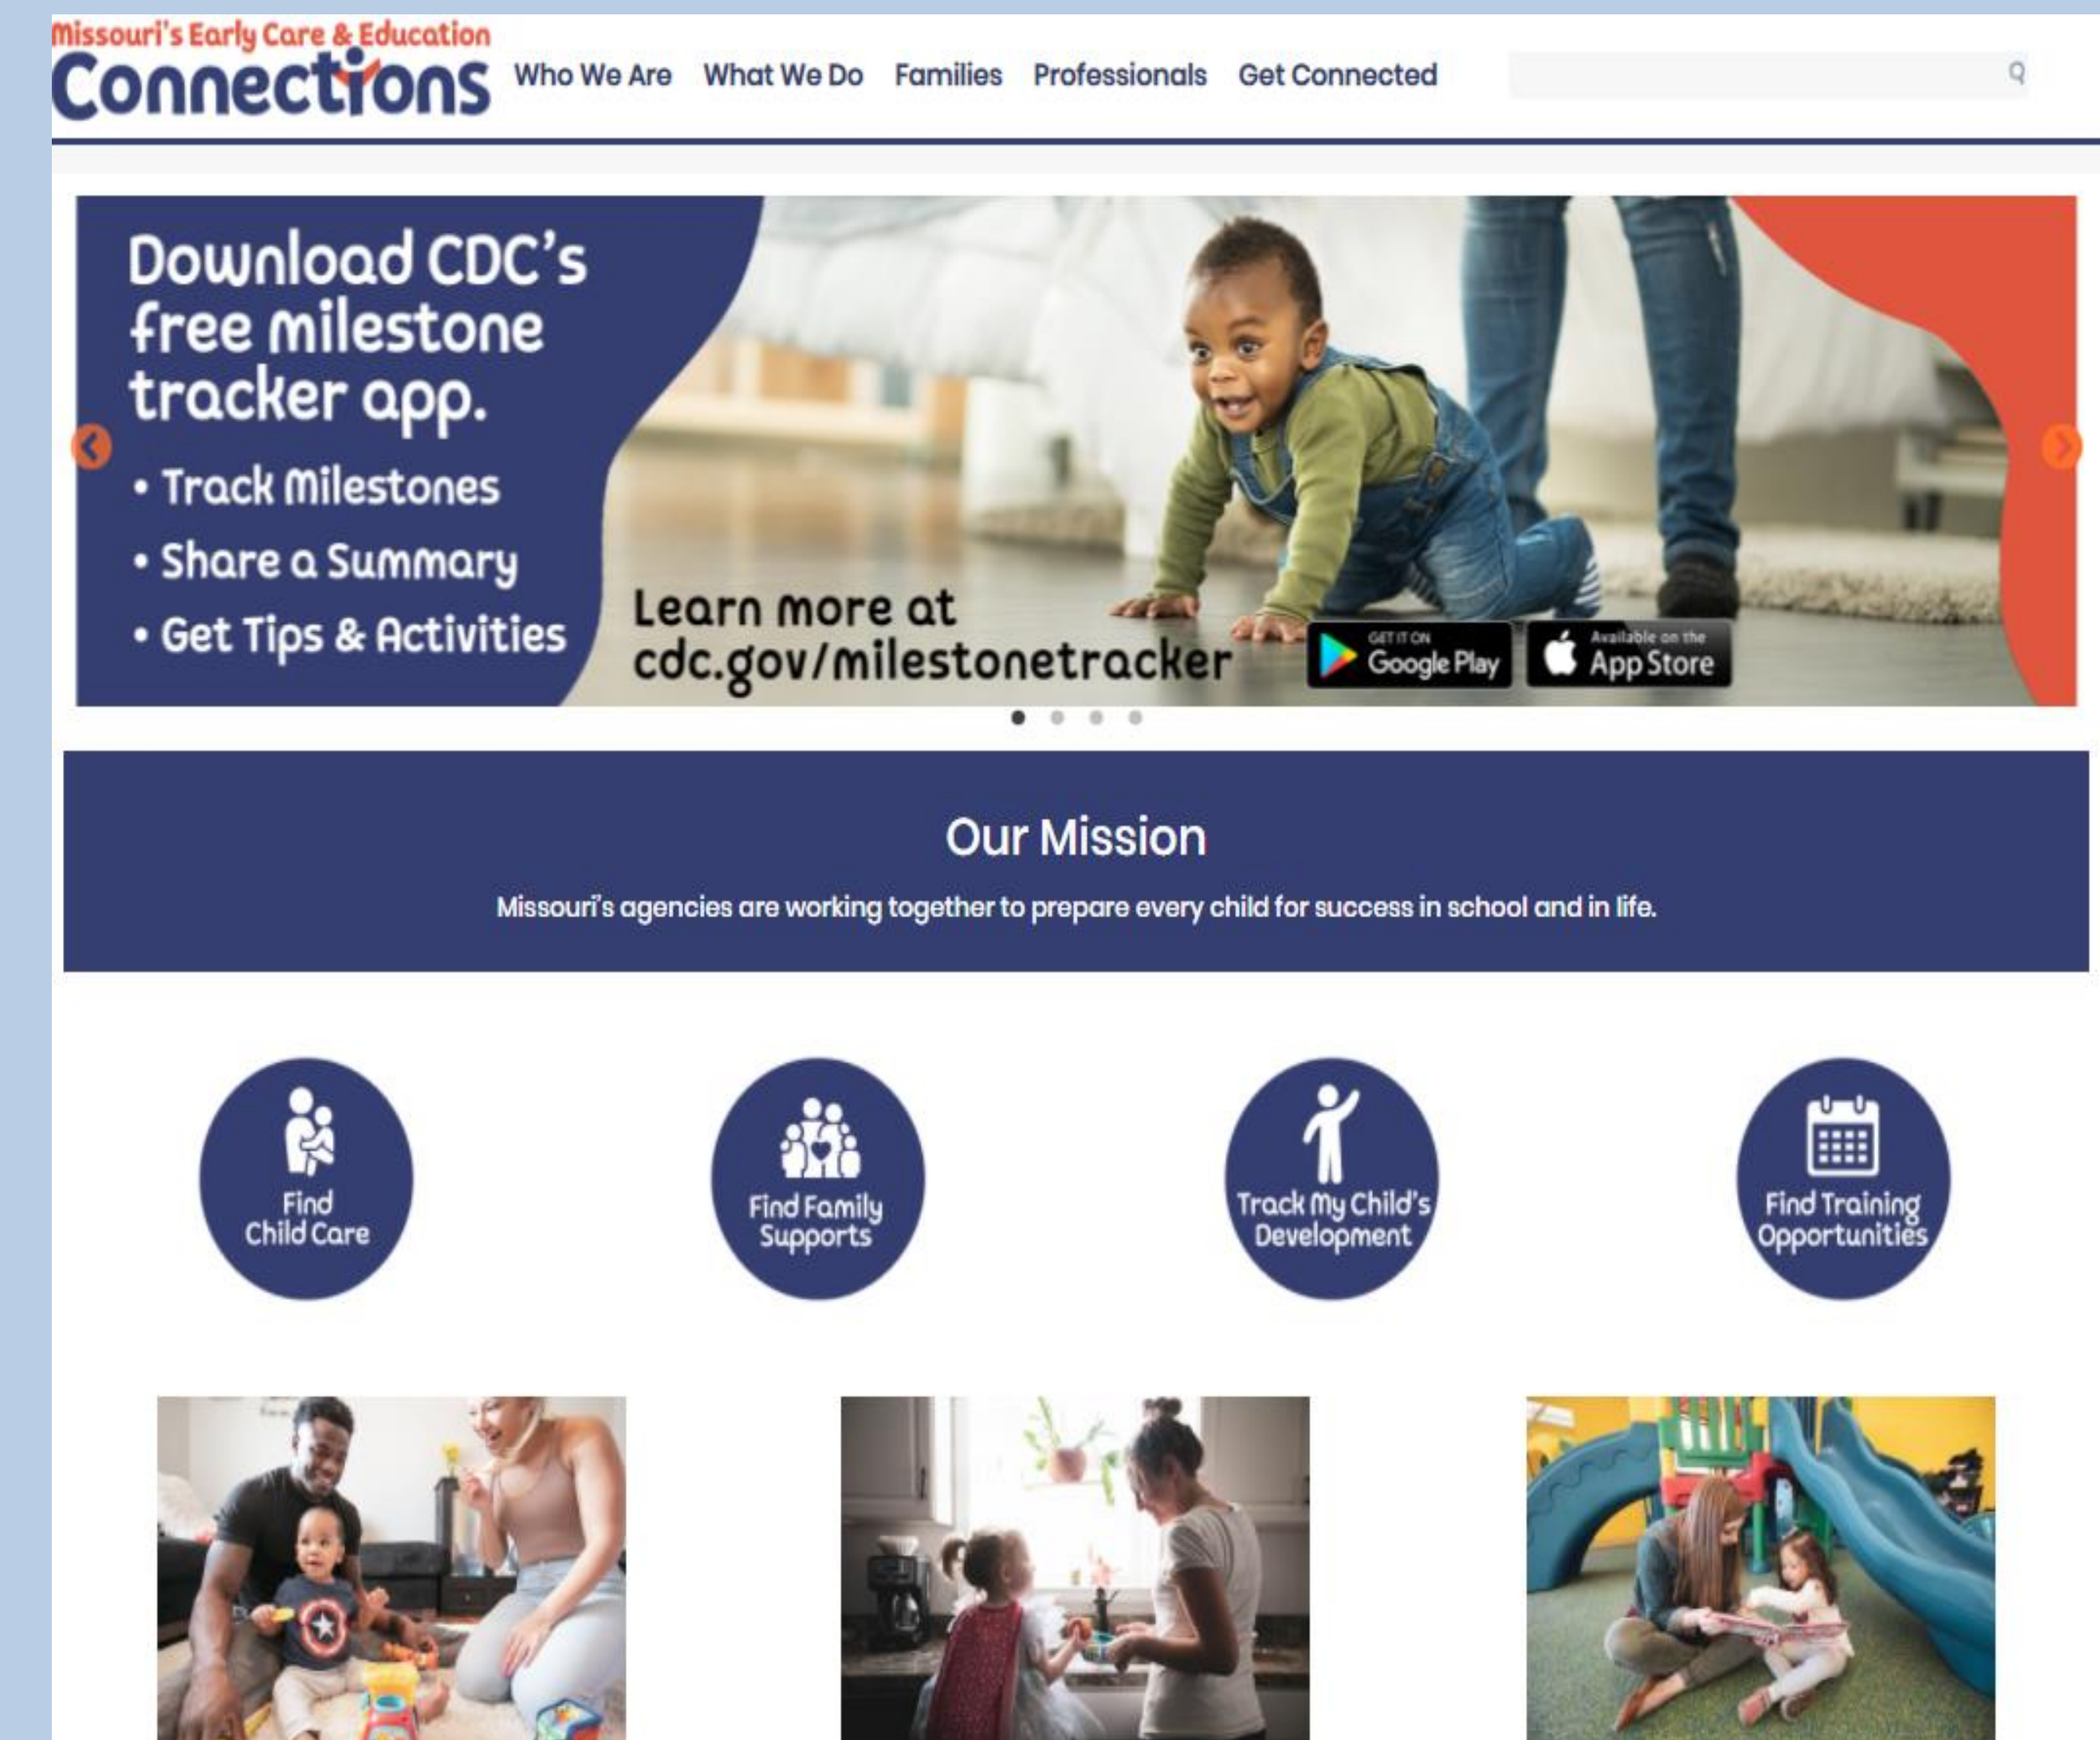

Create a streamlined and consolidated way for state agencies to share early childhood information to families and professionals.

The Results

Consolidated information from **13** early childhood programs and **5** state agencies... to create **1** website that makes it easy for families and professionals to access important information about services for children.

97% of stakeholders responded the website is easy to navigate
