

TEAMWORK HELPS STLCC GRADUATE EXPEDITE NURSING BOARD EXAMS PRIOR TO MILITARY DEPLOYMENT

PROBLEM STATEMENT

A Missouri nursing student was scheduled to be deployed to Kuwait on May 29th. The nursing program alerted the board that this student would not be able to take her national licensure exam and be licensed prior to her deployment.

ACTION

The nursing program expedited the student's transcript and delivered it to the Board of Nursing Office. That very same day, the board team processed her application and made her eligible to test. The student was able to take the exam May 19th. The Board team received the results May 20th and licensed her that same day.

RESULTS

This student was able to finish her degree, test and secure her license ahead of her deployment. Everyone worked together to make this happen. We all wanted her to reach her goal of obtaining her license before she left for deployment.
